ELSEVIER

J. Non-Newtonian Fluid Mech., 58 (1995) 363–364

Journal of Non-Newtonian Fluid Mechanics

Contents of Vol. 58

Vol. 58, No. 1

Use of the finite element modelling technique for the improvement of viscometry results obtained by cone-and-plate rheometers
J. Petera and V. Nassehi (Loughborough, UK) 1

Stability constraints in the formulation of viscoelastic constitutive equations
Y. Kwon and A.I. Leonov (Akron, OH, USA) 25

An experimental investigation of the interfacial instability in superposed flow of viscoelastic fluids in a converging/diverging channel geometry
B. Khomami and G.M. Wilson (St. Louis, MO, USA) 47

Numerical simulation of particle migration in concentrated suspensions by a finite volume method
Z. Fang and N. Phan-Thien (Sydney, N.S.W., Australia) 67

Short communication

A matched solution for corner flow of the upper convected Maxwell fluid
M. Renardy (Blacksburg, VA, USA) 83

Book reviews 91

Calendar 93

Vol. 58, Nos. 2/3

Modeling and computation of the onset of failure in polymeric liquid filaments
Q. Wang (Indianapolis, IN, USA), M.G. Forest and S.E. Bechtel (Columbus, OH, USA) ... 97

Anisotropic viscoelasticity of side chain nematic polymers
A.D. Rey (Montreal, Que., Canada) 131

Air-blast atomization of non-Newtonian liquids
A. Mansour and N. Chigier (Pittsburgh, PA, USA) 161

Electro-magneto-rheological effects in parallel-field and crossed-field systems
K. Koyama, K. Minagawa, T. Watanabe, Y. Kumakura and J. Takimoto (Yonezawa, Japan) 195

On the determination of the plug flow region in Bingham fluids through the application of variational inequalities
R.R. Huilgol and M.P. Panizza (Adelaide, S.A., Australia) 207

Viscoelastic flow between two opposing orifices
J. Sun, N. Phan-Thien and R.I. Tanner (Sydney, N.S.W., Australia) 219

An experimental investigation of the flow of dilute polymer solutions through corrugated channels
R.C. Yalamanchili, A. Sirivat and K.R. Rajagopal (Pittsburgh, PA, USA) 243

Finite element simulation of flow around a $3\pi/2$ corner using the FENE dumbbell model
P. Singh and L.G. Leal (Santa Barbara, CA, USA) 279

A convergence study for the numerical simulation of the IUPAC–LDPE extrusion experiments
G. Barakos and E. Mitsoulis (Ottawa, Ont., Canada) 315
Non-linear overstability in the thermal convection of viscoelastic fluids
R.E. Khayat (Boucherville, Que., Canada) 331
